WESMARC
SUPER DOORS

SUPER DOORS

wesmarcdoors.com

Wesmarc Super Doors is another chapter in our entrepreneurial journey to transform Indian homes and commercial spaces just like my family and I had done with Ashirvad CPVC pipes. This time my son Aman Poddar is leading the transformation of doors, a space ready for disruption. We welcome you to our 2,00,000 sq ft German designed robotic factory in Bommasandra, Bangalore to experience the new future of doors.

*"Some day all doors
will be made this way"*

Aman Poddar

Pawan Poddar

INDIA'S MOST **MODERN & LARGEST** DOOR & FRAME MANUFACTURING

DOORS OF TOMORROW, FOR TODAY.

We create intelligent doors that work as well as they look. Because, we think that doors should not only bring your vision to life with a vibrant dash of colour or a minimal touch of class, but also enhance your everyday experiences.

So, with every door, we endeavour to make homes more intimate, office spaces quieter and public spaces more utilitarian. All while working perfectly time and again.

There is a belief which lies at the core of every WESMARC door: that every door should be safe and durable, work smartly and enhance the aesthetics of the space.

CPL Veneer Dark Oak / Door model A.1

A deep understanding of Indian sensibilities and day-to-day life and a thorough knowledge of the best in European engineering drives everything we create.

LOOKS SOPHISTICATED. FEELS INTELLIGENT.

Yes, our doors are beautiful. However, they go beyond just their appearance, because we understand what is important to you. Your space reflects memories, passions and the security of all that you hold dear. So, we help you choose the full door (door, frame and hardware) that is best suited for you. Which is why, we pay attention to the tiniest of details, and ensure the very best design, safety and durability in every single door.

DESIGN

WESMARC designs come from an appreciation for global trends and contemporary Indian styles. But at their core, our doors are designed to do one thing: to make life easier.

Through a state-of-the-art manufacturing process, and a watchful eye for the best materials, we've created a wide range of doors that is consistently world-class, with no compromise, even at scale. Furthermore, our doorsets can be installed with 2 hands and in just 30 minutes.

DURABILITY

Ever counted the number of times you open and close your door? Well, we have! To make our doors future proof, once the materials have met our standards, we comprehensively test every individual component and then the assembled full door, both mechanically and environmentally. We make sure that every WESMARC door is engineered to withstand the vast differences in usage patterns and environmental conditions, just so it feels like the first time, every time you open the door.

SAFETY

All of our doors are designed intelligently to maximise the safety of the space it encloses, because your safety is important to us. So important, that we make doors that are fire retardant, acoustically insulated or even reinforced with metal sheets. Moreover, every component is crafted to be easy-to-use, but tough to misuse. And we make all of this available to you at a simple half turn of the key. All to make sure that you always have the peace of mind you deserve, on either side of the door.

THE BEST OF THE WORLD, CRAFTED FOR INDIA.

4+ Decades of experience in the Indian construction space and a constant thirst for innovation led us to realize that the market needs a smarter solution when it comes to doors, frames & hardware.

So with the aim of shifting the paradigm, we surveyed technologies across the world, and identified the best of European practices. With this as a starting point, we invested over 4 years' worth of effort to develop our own range of products, re-engineered and attested to withstand the vast differences in usage patterns and environmental conditions across our country.

200000 sq. ft

India's most Modern & Largest Door and Frame manufacturing.

15000+ SKUs

Product ranges across wood, engineered and glass.

47+ years of expertise

Across manufacturing, nationwide distribution and creating a leading brand in the Indian building industry.

INDIA'S MOST
MODERN & LARGEST
DOOR & FRAME MANUFACTURING

Our high-tech, automated manufacturing unit at Bengaluru.

LEGACY

WESMARC is the continuing legacy of a 3rd generation Indian entrepreneurial family that has a distinct track record for pioneering solutions, disrupting markets and climbing to a position of leadership since 1975.

Behind all of this success, however, is a simple ethos: a thorough understanding of the needs of the customer, a commitment to inculcate the very best practices, an uncompromising passion to execute an elegant solution and ultimately, to elevate the entire ecosystem.

At WESMARC, we don't just make a better product, but we strive to achieve a holistically better way of doing things: from selecting the right full door (door, frame & hardware), to its installation and finally to its everyday use!

We've also made the process of choosing the right full door simple and transparent, because we intend to make life easier, not only by creating doors that are easy to install and use, but also by bringing in simplicity and transparency to the entire process.

FULL WALL WRAP ADJUSTABLE FRAME (F.W.W.A.F.)

Eng. wood full wall wrap adjustable frame :Unique solution on the market wrapping the entire thickness of the wall ranging from 80mm up to 340mm thickness of the wall and comes pre-fitted with a co-extruded acoustic seal within the jamb groove.

Using our telescopic adjustable architraves, each frame size can be further adjusted by up to +20* mm on the thickness of the wall. Architraves are seamlessly joined at 45 degree & are 60 mm wide & 12mm thick. A high level of detail that also adds to the stability of the frame. Furthermore, they are finished with matching CPL veneers that give the impression of the perfectly finished frame creating a PORTAL look.

WESMARC FRAME

- Wraps the whole thickness of the wall.
- Door leaf is larger.
- More daylight compared to block frame.
- Allows for high wall tolerances on height (+Any mm/-50mm), width (+30mm/-50mm) & thickness (+20mm/-0mm).

TRADITIONAL/TYPICAL BLOCK FRAME

- Sits within the thickness of the wall.
- Door leaf is smaller.
- Less daylight compared to WESMARC frame.
- Allows for minimum wall tolerances, which will require additional work during installation.

REBATED DOOR

INDIA'S
1ST AND ONLY

Eng. wood rebated doors: Another unique solution on the market is rebated doors (Profiled edges) which add to the modern design of door leaves. This intelligent solution further aids in barricading dust, light, a/c losses & improves acoustic insulation between the rooms. To improve mechanical stability & durability against moisture, our doors are PVC edge banded using PUR glue on all the 4 leading edges.

The rebated profile also allows for easy adjustments, in both width (+/- 2mm) & height (+/- 2mm) between the door and frame to get the perfect & seamless installation, everytime.

WESMARC DOOR

- Rebated doors of thickness 40, 42mm & 45mm.
- Modern design, no gaps with frame, Increasing acoustic insulation.
- Barricades dust, light and a/c losses.
- Opens the door to 180° and easily adjustable in 3D.

STRAIGHT/FLAT DOOR

- Typical door thickness 32/35mm.
- Old design, visible gaps with lesser acoustic insulation.
- Does not barricade dust, light and a/c losses.
- 3D adjustments not possible using traditional leaf/butt hinges used on straight edge doors.

EXPERTISE INSTALLED

We engineer and create doors that are intuitive, so they're both easy to install and also ensure an effortless experience, every day.

DESIGN

WALL WRAP ADJUSTABLE FRAME

Create the **PORTAL** look.

- Wraps the full thickness of the wall.
- Integrated acoustic seal
- Wraps from 80mm to 340mm.
- Adjustable tolerance up to 20 mm.

REBATED DOORS

What happens inside, stays inside.

- Barricades dust, light and a/c losses.
- Increased acoustic insulation.
- Modern design, no gaps.

EASE OF INSTALLATION

Simply installed by 2 hands in 60 min.

- Clean installation, no dust, no sound.
- No resizing, polishing or finishing.
- No damage to finished rooms.

CPL VENEERS

Creating the first impression.

- High resistance & durability to scratches.
- Looks and feels like natural veneer.
- No colour variations, no maintenance.

SAFETY

2 ALUMINIUM SHEETS INSIDE

Stands the test of time.

- Reinforced construction.
- Provides additional strength & durability.
- Provides additional insulation.

REINFORCED LOCKS & STRIKER PLATES

Easy to close.
Impossible to pick.

- Multi locking Security bolts .
- Reinforced rounded striker plates.
- EN rated Mortise lock & Cylinder.
- Perfectly flush fitted. No protruding elements.

DURABILITY

HINGES

The strong backbone.

- Door ingeniously just hangs on.
- Modern and sleek design. Soft closes the door with ease.
- Opens the door to 180°.
- Easily adjustable in 3D.

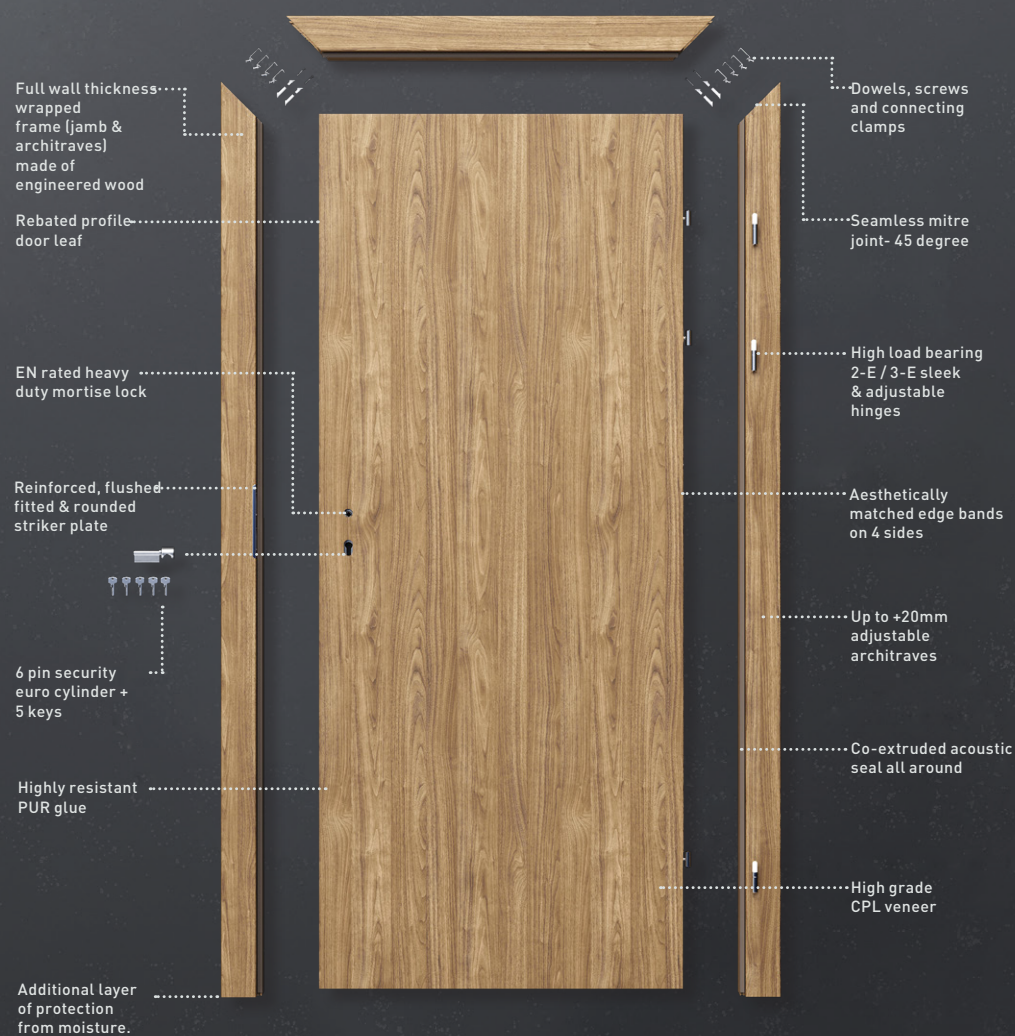

PUR ADHESIVE

We think of the little things, for you.

- High resistance to moisture & varying weather conditions.
- Excellent low & high temperature performance.
- Adequately applied across the entire Door & Frame construction.

CPL Veneer Natural Eucalyptus door leaf & White frame/ Door model A.1

Full Door : Door leaf, Frame (Jamb + Architraves), Hardwares, Accessories & Installation parts

Experience unrivaled reliability and elegance with our Rebated Doors featuring adjustable frame technology now in India. Embraced by prestigious buildings in Dubai, Germany, and Europe, this innovation sets a new standard for excellence and ensures top-notch quality worldwide.

German Engineered. Bharat Made

SCIENCE INSIDE SIMPLE OUTSIDE

WESMARC is your one-stop-shop for a full door (door, frame and hardware). The design of our doors brings simplicity and transparency to your decision-making process.

Plug and Play: Every part of a WESMARC door, from the door and frame, right down to the smallest of components is engineered for ease of installation. All the elements are packaged carefully and are ready to install, thus a full door can then be easily installed with just 2 hands and in 60 minutes. No Dust. No Noise. No Damage.

1 Application & Material

Start by identifying where the door is intended to be used & which construction type you prefer or otherwise require. Wesmarc doors are best suited for residences, offices, hotels, hospitals and other commercial spaces, as entrance or interior doorways, in spaces such as bedrooms, bathrooms and others. We build our doors with wood / engineered materials for its intended performance.

2 Dimension & Orientation

Note the height, width and thickness of the clear, finished wall opening where the door is to be installed. Also, determine which way the door should open, and choose a left or right door accordingly.

3 Design & Finish

The easiest step of them all. Simply choose the design or model of the door you want and the CPL veneer finish for the door and frame individually.

DOOR. FRAME. HARDWARE

WESMARC PRODUCT ARCHITECTURE

WOOD

ENTRANCE (PREMIUM)

Created to offer a high level of security at the entrances of apartments, villas, offices and other commercial spaces, this unique set of aluminium sandwiched premium entrance doors are aesthetically sophisticated and incredibly difficult to misuse.

ENTRANCE (OPTIMUM)

Not Just A Door. A super Door

Discover a revolution in doors with Wesmarc – A complete system that makes our doors Super Doors, offering superior protection, aesthetics, and finish.

STYLISH

Select your preferred finish from a variety of models and veneers. Choose from a range of European locks and accessories.

STRONG

Strength and fire-resistance with a sandwiched aluminium layer. Superior quality with super thick 42 mm door with 5.5 mm deck.

SAFE

Theft-proof doors secured by inbuilt triple security lock bolts. Double heavy duty mortise locks with reinforced striker plates.

SMART

Zero gossip doors with acoustic insulation and PVC edge banding. Smooth and silent operation provided by adjustable hinges.

TERMITE PROOF

Ensuring termite protection for enduring quality and timeless appeal in every aspect.

CO-EXTRUDED ACOUSTIC SEAL

Superior sound insulation, gentle soft closing, and seamless aesthetic integration for enhanced comfort and functionality.

WATER PROOF

Perfect for all climates, ensuring durability and performance regardless of environmental challenges or changes.

SECURITY

Enhanced security deters intruders, providing peace of mind with robust protection and reliable defense measures.

SCRATCH RESISTANT

Imported CPL veneer: durable, scratch-resistant, and easy-to-clean, ensuring long-lasting quality and low maintenance.

ENERGY EFFICIENT

Rigorously tested, ensuring optimal performance and savings in any environment.

MAINTENANCE FREE

Combining design, safety, and durability for a harmonious blend of aesthetic appeal and easy maintenance.

ECO - FRIENDLY

Eco-friendly material offering beauty, durability, and versatility for sustainable and stylish design solutions.

INSTALLATION MADE EASY

Easily installed by two hands in just 60 minutes for quick and straightforward assembly.

FULL WALL WRAP ADJUSTABLE FRAME

Achieve the distinctive PORTAL aesthetic with our innovative design and styling options.

REBATED DOORS

Confidentiality assured: what happens inside remains private and secure within our trusted environment.

FIRE PROOF

Fire-resistant doors ensure 45 minutes of protection and prevent smoke leaks.

LEFT OR RIGHT?

An aspect of buying a door that is often overlooked until the last minute is its orientation and direction of opening. In other words, do you need a left or right door?

How do you determine whether the door is a left or a right door?

1.

Locate which side of the frame the hinge is on.

2.

Stand between the frames facing directly towards the hinge.

3.

If the door opens towards your Left, it's a left arm stretched out door.

4.

If the door opens towards your Right, it's a right arm stretched out door.

Left door

Right door

Look from one side.

Look from the otherside.

FLUSHED OR REBATED?

Perimeter Frame seal :
High quality co-moulded & extruded seals ensures comfort of use by soft closing the door and improving acoustic insulation.

Architraves :
60 mm wide & 12 mm thick architraves are finished with matching CPL veneers and give the impression of the perfectly finished frame.

Mitre frames at 45°:
Architraves are seamlessly joined at 45°. A high level of detail also adds to the stability of the frame.

Eng. wood wall wrap frame :
Unique solution on the market wrapping the entire thickness of the wall. Can be adjusted up to 20 mm.

Striker plate :
Perfectly fitted without any protruding elements. Reinforced with steel plates & slots finished with stiff plastic end caps.

PUR Adhesive :
High resistance to moisture & varying weather conditions. Adequately applied across the entire Door & Frame construction.

PRODUCT INFO

Frames add all the detail and value to a well-designed interior. It's the little things that count. To compliment a high-design door, one needs an even more sophisticated and intelligent frame.

A well-designed frame covering the entire thickness of the wall, the possibility of adjustment up to 20mm and extremely easy and quick installation make our product unique in the market.

All our frames are integrated with a perimeter acoustic seal and are offered with 60mm wide architraves in matching CPL veneer to the main frame.

WESMARC DELIGHT STUDIOS

Introducing the new WESMARC Experience Centres in Bangalore, Chennai, Hyderabad, Coimbatore, Mysore, Vijayawada, Visakhapatnam, Kerala, and more upcoming centers.

Discover complete doors, frames, and hardware all in one place, making door and frame selection easier than ever. See and believe the possibilities firsthand at our state-of-the-art display galleries strategically located across these cities.

INSTALLATION MADE EASY

STEP 1

Glue and assemble the factory finished vertical elements of the frame to the horizontal with the provided screw and clamp assembly.

STEP 4

Now, for the reverse side, the factory finished architrave is easily assembled the same way using glue, screws and clamps. The result is a firmly jointed & perfectly finished 45° edge.

STEP 2

Our unique hinges lock to the architrave by just tightening its screw. Then the entire frame assembly is placed within the wall opening and aligned.

STEP 5

This is then simply push fixed with some glue into the slotted groove in the main frame.

STEP 3

Stability bars are clamped on the frame & wall, following fix the hidden anchor fasteners and using a gun, expanding PU foam to cover the gap between the frame & the wall.

STEP 6

Finally, the factory finished door leaf with its pre-installed lock and hinge is literally just hung onto the hinge on the frame. Millimeter alignment precision can be achieved in 3D by a simple adjustment of the hinge screw using just a screwdriver.

DOOR FRAME HARDWARE

DOORS OF TOMORROW, FOR TODAY.

Doorways divide and connect worlds.
They form both the first and last impression.
They are quiet in their presence, and yet speak
volumes about the space they secure.
They give you a sense of safety when you enter and
a sense of reassurance when you are out.
They offer a glimpse of life as it could be, and
also of how far a journey it's been.

Doors are the quiet chroniclers of life,
and every time you step through a door,
you pick up a story where you left off.

So, we believe that every time you open a door, you
